1. Connection diagrams

1.1. Direct connection

Logic level voltage is 3.3V.

Connection diagram is shown on the picture.

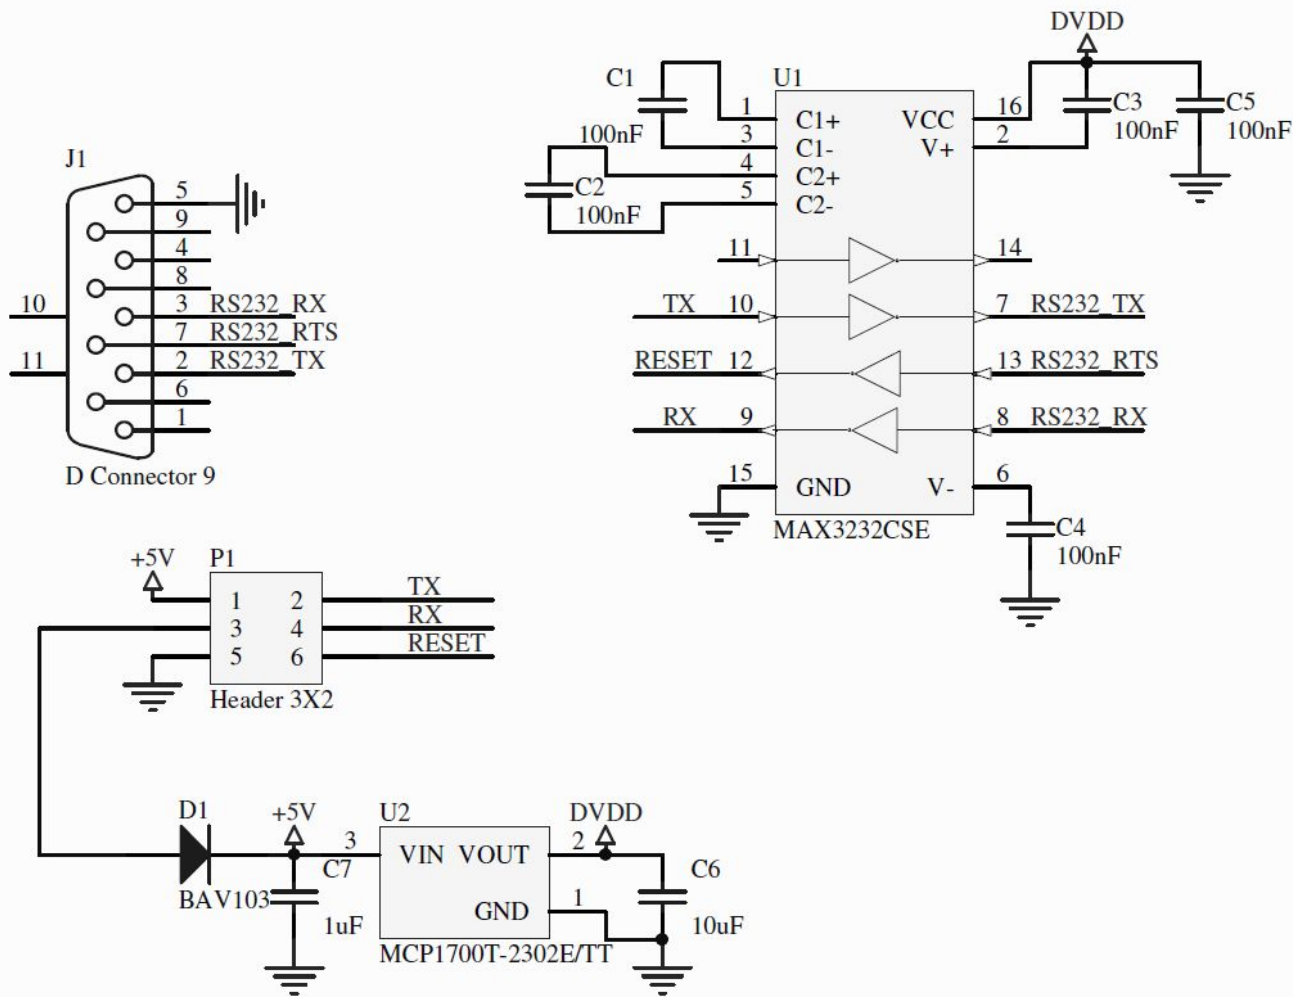

1.2. Connection via RS232 to TTL converter

RX input pin on device is connected to pin 3 on DB9 RS232 connector via converter.

TX output pin on device is connected to pin 2 on DB9 RS232 connector via converter.

Reset input pin on device is connected to pin 7 (RTS) on DB9 RS232 connector via converter.

Schematic diagram of the converter is shown on the picture.

1.3. Connection via FTDI TTL-232R-3V3 cable

Use this cable with factory settings.

Connection diagram is shown on the picture.
